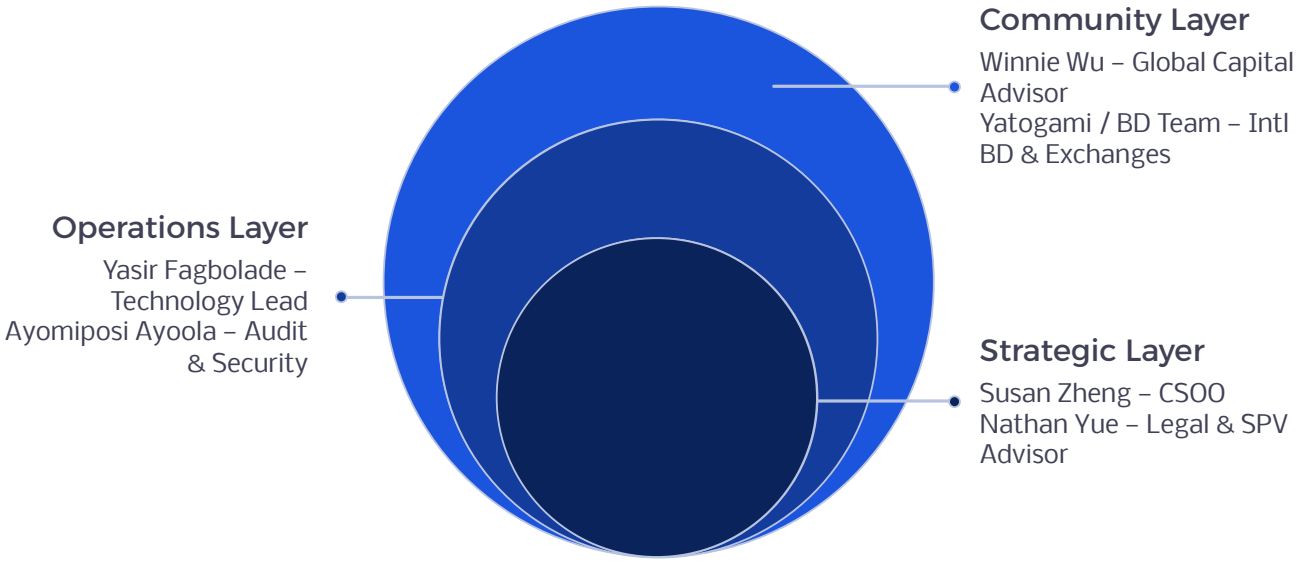
AGV Protocol – Global Management & Governance Overview (2025)

Strategic overview of AGV Protocol's comprehensive management structure, combining real-asset execution, cross-border legal structuring, and on-chain engineering expertise across three operational layers.

AGV Protocol – Global Management & Governance Structure 2025

This organizational chart visually outlines the hierarchical structure and key personnel across AGV Protocol's three core operational layers, illustrating the interconnectedness and specialized expertise within the global management framework.



This comprehensive structure ensures robust governance, efficient technological execution, and dynamic community engagement, critical for the protocol's global expansion and operational integrity.

Legal Entities: New Zealand iJet Limited (Issuer) | JLL Asset Ltd. (BVI SPV) | Zhongshang Puhui (Mainland Ops)

Strategic / Governance Layer

The strategic governance foundation of AGV Protocol comprises four key leadership positions, each bringing specialised expertise in cross-border operations, legal structuring, blockchain governance, and capital markets.

Susan Zheng

Chief Strategy & Operations Officer

Strategic operations, cross-border capital, public-private partnerships

Former HNA Group executive; 20+ yrs experience in project finance, renewable infrastructure, and multi-jurisdiction operations. Leads AGV's institutional strategy, compliance, and global partnerships.

Nathan Yue

Legal & SPV Advisor / Financial Governance

International corporate law, BVI/NZ structuring

Cross-border legal counsel specialising in SPV and RWA structuring; ensures all assets comply with BVI, NZ, and mainland China regulations.

Tailin Wu

Head of Smart Contracts & DAO Governance

Blockchain engineering, DAO architecture, token economics

Experienced DePIN architect and Solidity developer; designs Power-to-Mint token logic and oversees DAO treasury mechanics.

Lynn Wang

Capital Markets & Community Relations

Institutional fundraising, investor relations, quantitative finance

Former quant fund manager with > ¥10 B AUM track record; deep network in APAC VC and family offices; connects on-chain community with real-world finance.

Governance Interface Legal entities under management: New Zealand iJet Limited (Issuer) | JLL Asset Ltd. (BVI SPV) | Zhongshang Puhui (Mainland Operations)

Operations & Technology Layer

The operational backbone of AGV Protocol encompasses technology leadership, security oversight, frontend development, design coordination, and strategic communications across five specialised roles.

1

Yasir Fagbolade

Technology Lead

System architecture, blockchain infrastructure

Leads engineering execution across IoT data feeds, node orchestration, and on-chain integration. Former DePIN and AI-compute infrastructure engineer.

2

Ayomiposi Olaoluwa Ayoola

Internal Audit & Security Lead

Risk management, compliance audit, cybersecurity

Oversees internal controls and security audit coordination (Beosin liaison). Background in finance security and audit analytics.

3

Ajibike Abdulqayyum

Frontend Engineer

Web3 UI/UX, dApp development

Focuses on cross-chain dashboards and data visualisation for asset and token monitoring.

4

UI / Tolu

BrandKit & Frontend Design

Product design, corporate visual identity

Builds the AGV BrandKit and Investor Portal front-end interface; ensures unified design standards across all platforms.

5

Morakinyo O.

Public Relations & Communications Logic

Strategic PR narratives, technical storytelling

Crafts external communications and investor positioning for RWA and AI energy segments.

Community & Partnerships Layer

Winnie Wu

Global Capital & Ecosystem Advisor

DAO ecosystem growth, KOL network management

Founder of G3 Fund; bridges VCs, exchanges, and KOLs across Asia and EMEA for strategic alliances.

Yatogami / BD Team (5)

International BD & Exchange Relations

Institutional partnerships, CEX relations

Handles external exchange and launchpad coordination with Binance Chain, OKX Ventures, etc.

Jibril

HR Coordination / KOL & Launchpad Relations

Recruitment & community partnerships

Oversees global recruitment and launchpad campaign integration for KOL and social mining initiatives.

PeaceMooner

Social Media & Community Growth Manager

Content strategy, brand growth

Leads AGV's social channels (TaskOn / Zealy / Galxe), building grassroots DAO participation.

Legal Entities: New Zealand iJet Limited (Issuer) | JLL Asset Ltd. (BVI SPV) | Zhongshang Puhui (Mainland Ops)

Team Narrative

The AGV core team combines **real-asset execution, cross-border legal structuring, and on-chain engineering** experience. Members have backgrounds spanning **project finance, international audit, energy infrastructure, Web3 protocols, and DAO operations**, forming a rare hybrid team capable of executing **AI power + RWA tokenization** globally and compliantly.

This composition directly answers the two key VC questions:

1 *Can they operate cross-jurisdictionally with compliance discipline?*

→ **Yes** (NZ + BVI + CN entities).

2 *Can they deliver both physical yield and on-chain value?*

→ **Yes** (proven IRR + DAO Treasury growth).

Hiring Plan 2025–2026 (Summary Table)

Department	Role	Headcount	Timeline	Status
Finance & Compliance	Compliance Officer	1	Q1 2026	Planned
Engineering	Blockchain Developer	2	Q4 2025	Ongoing
Operations	RWA Project Manager	1	Q2 2026	Planned
Marketing & Growth	Data Analyst	1	Q1 2026	Planned
DAO Governance	DAO Analyst	1	Q1 2026	Planned
Design	Visual Designer	1	Q4 2025	Filled

The strategic hiring plan focuses on strengthening compliance capabilities, expanding blockchain development capacity, and enhancing operational oversight across RWA project management and DAO governance analytics.
